

TABLES

2.1	Correlation Between Percent Membership Change and NCD Rate	59
2.2	Average Percent Change in Zip Code Population for New Churches and Older Churches	75
2.3	Percent of Churches Black or Ethnic by Denomination	77
2.4	Percent of Churches Growing by Racial/Ethnic Status	78
2.5	Percent of Churches Growing, Plateaued, or Declining: 1983–1988	79
2.6	Percent of Churches Growing by Date of Organization	80
4.1	Number of Churches in ABC/USA	113
4.2	Resident Membership in the ABC/USA	117
4.3	Worship Attendance and Resident Membership in the ABC/USA: 1977 and 1990	121
4.4	American Baptist Mission Support (ABMS) in Constant 1977 Dollars for 1977 and 1990	122
7.1	Relationships Between Local Church Efforts and Total New Members in 1985–1987	159
7.2	Relationships Between Local Church Efforts and Total New Members in 1985–1987 for Different Size Churches	164
7.3	Partial Correlations Between Participation in Church Growth Program and Number of New Members Received	167
8.1	Involvement in Recruitment by Church Growth Among United Presbyterian and Southern Baptist Churches	173
8.2	Evangelism Indicators by Church Growth	175
8.3	Items Included in the Evangelism/Outreach Scale	179
8.4	Evangelism Scale by Church Growth	180
8.5	Multiple Regression: Three Sets of Church Growth Predictors	182
8.6	Multiple Regression: Variables Combined	184
9.1	Variables in Final Analysis: Zero-order Correlations, Regression Coefficients Within Clusters, and Explained Variance for Clusters	193
9.2	Membership Change in Twelve Subgroups and Variance Explained by Three Sets of Clusters in Twelve Subgroups	200

12 / TABLES

10.1	Variables in Final Analysis: Zero-order Correlations, Standardized Regression Betas Within Clusters, and Explained Variance for Clusters and Types	212
10.2	Variance in Church Growth Explained by Contextual Variables by Church and Community Size	217
11.1	Zero-order Correlations of $\pm .20$ or Stronger Between Measures of Congregational Growth/Decline and Various Congregational Characteristics	230
11.2	Ten Strongest Zero-order Correlations Between Reports of Congregational Growth/Decline and Various Congregational Characteristics, by Denomination	232
11.3	Ten Strongest Zero-order Correlations Between Reports of Congregational Growth/Decline and Various Congregational Characteristics, by Congregation Size	234
11.4	Partial Multiple Correlations for Regression Models Predicting Pastor's Perception of Church Growth	236
P3.1	Reasons for Decreasing and Increasing Church Involvement	246
12.1	Definitions of Variables and Scales	258
12.2	1978–1988 Change in Marginal Percentage Distributions	259
12.3	1978–1988 Membership and Attendance Change Within Categories of Independent Variables	261
12.4	Step Descriptions	262
13.1	Percent Weekly Service Attenders in Canada: 1975–1990	279
13.2	Percent Religious Group Membership in Canada: 1975–1990	280
13.3	Percent Religious Correlates by Denomination: 1990	281
13.4	Confidence in Religious Leaders: 1985–1990	282
13.5	Percent Religious Involvement and Importance by Age for Select Religious Groups: 1990	283
13.6	Membership and Attendance Projections for Select Religious Groups Based on Membership and Attendance Levels of Current 18- to 34-year olds	284
13.7	Value Placed on Religion and Religious Group Heritage: 1990	286
13.8	Conventional and Less Conventional Beliefs and Practices	287
13.9	Percent Select Religious Characteristics by Religious Service Attendance: 1990	289
14.1	Worship Attendance for Older and Younger Baby Boom Cohorts in 1972–1973, 1982–1983, and 1987–1988	296

14.2	Switching Patterns: Religion Reared and Current Religion	297
14.3	Patterns of Institutional Involvement for Major Traditions	300
14.4	Religious Indicators for Loyalists and Returnees	305
14.5	Religious Individualism for Loyalists and Returnees	307
14.6	Religious Characteristics of Older and Younger Baby Boomer Cohorts	309
15.1	Demographic Differences in the Percentage of Churched Black Americans, 1978–1988	316
15.2	Percent of Churched Black Americans in 1988 by Selected Religious and Demographic Predictors, Within Regional and Residential Categories	319
15.3	Percent of Churched Black Americans by Response to: “Churches Have a Clear Sense of the Real Spiritual Nature of Religion,” Within Regional and Residential Categories	320
16.1	Zero-order Correlations Between Individual-Level Variables and Measures of Religious Participation	330
16.2	Zero-order Correlations for Relationships Between Local Contextual Variables and Measures of a Parishioner’s Level of Religious Participation	333
16.3	Zero-order Correlations for Relationships Between Local Institutional Variables and Measures of a Parishioner’s Level of Religious Participation	336
16.4	Variance Attributable to Sets of Individual, Contextual, and Institutional Variables	342
16.5	Percentage of Adjusted Total Variance in the Measures of Religious Behavior Explained by the Set of Individual-Level, Local Contextual, and Local Institutional Variables	343
16.6	Specific Blocks of Variables That Are the Strongest Predictors of Religious Participation	344

APPENDIX TABLES

A1.1	Membership Trends: 1950–1990	393
A1.2	Five-Year Membership Growth Rates: 1950–1990	396
A12.1	All-Respondent Regressions	398
A12.2	Conservative Protestant Regressions	399
A12.3	Liberal Protestant Regressions	400
